DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 23 April 2009 amends claims 1, 5, and 6. Claims 4 and 9 have been cancelled. Applicant's amendment has been fully considered and entered.

Response to Arguments

2. Applicant's arguments, with respect to Bianco have been fully considered and are persuasive. The previous rejections of claims 1, 5, and 6 have been withdrawn.

Allowable Subject Matter

3. Claims 1, 5, and 6 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose or make obvious the claimed authentication process wherein an authentication server defines a plurality of authentication modules that are available in a communication system. At least one of the authentication modules is locally executable on the authentication server, while at least one of the authentication modules is remotely executable on a communication node remote from the authentication server. A plurality of authentication domain identifiers are mapped to a corresponding configuration of the authentication modules. One of the authentication domain identifiers is sent from an end-user client to the authentication server where an authentication stack is created based on the configuration of the authentication modules corresponding to the received authentication domain identifier and the mapping. The stack includes a plurality of stack entries where each stack entry is mapped to a respective authentication module such that for each stack entry determined to be mapped to a local authentication process, initiating a local authentication process corresponding to the local

authentication module. In addition, for each stack entry that maps to a remote authentication module, a remote authentication process is initiated that corresponds to the remote authentication module. The results of all local and remote authentication processes are consolidated into a single result that is used to determine the authentication status for the end-user client.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
